## HEALTH DESK

The best ways to prevent the spread of a virus is:

- a. **Wash your hands** often with soap and water or an alcohol-based hand rub.
- b. **Not to share personal items** like drinks, food or unwashed utensils.
- c. **Cover coughs or sneezes with a tissue** if a tissue is not available, we encourage you to have them sneeze into the elbow, arm or sleeve areas. Make sure your children wash their hands after sneezing to kill germs.
- d. **Keep sick children at home** Keeping children with a fever at home will reduce the number of people who may get infected.

We are currently updating our parent e-mails. As soon as they are all in the system we will begin emailing the Friday Flyer to those parents that requested we do so. Thank you for your patience and cooperation.
